

# Classic db Meter

1mA Full Scale

Internal resistance ~100 ohms

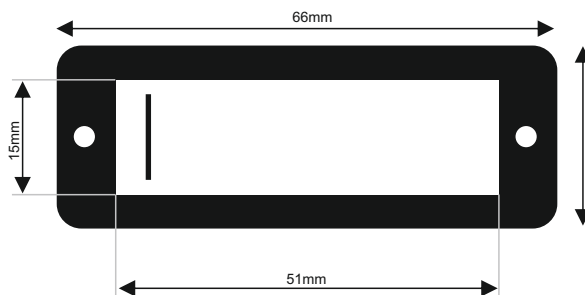

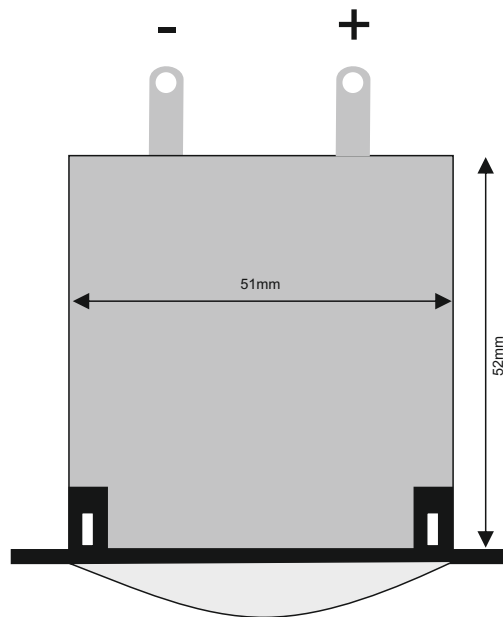

There is a needle zero adjustment screw at the top of the meter.

The meter can be illuminated by putting LEDs behind/on top of the meter.

Can be used vertically or horizontally.

The scale can be changed. (so you can print your own scale with your own logo or a different scale value)

You can fix the meter with the bezel visible from the frontpanel, or you can fix the meter from behind the frontpanel. (so that only the two screws are visible)

Recommended frontpanel cutout: 51,3mm x 15,6mm
